JITENDRA KUSHWAH

Senior Full-Stack & Mobile Engineer | Node.js, React Native & MERN Stack

jitendrakushwahsingh@gmail.com • +91 9009355417 • Indore, MP, India • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

Full-Stack & Mobile Software Engineer with ~5 years of progressive experience at WebiWork Technologies architecting, developing, and deploying end-to-end web and mobile applications across Node.js, React Native, and the MERN stack. Proven track record building high-throughput RESTful APIs in Express and NestJS, background worker queues with BullMQ and Redis, production cross-platform iOS and Android apps with background audio streaming and offline caching, and responsive Next.js web applications (SSR/SSG). Skilled in database design across MongoDB and PostgreSQL, third-party payment workflows with Stripe and Razorpay, and AWS S3 cloud media delivery.

TECHNICAL SKILLS

- **Languages & Runtimes:** Node.js, TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3
- **Backend & Frameworks:** Express.js, NestJS, RESTful APIs, MVC Architecture, Socket.io (WebSockets)
- **Mobile Engineering:** React Native (v0.71–0.85), iOS & Android Bare Workflow, react-native-track-player, MMKV, Notifee
- **Frontend & Web:** React.js (v18/19), Next.js (App & Pages Router, SSR, SSG), Redux Toolkit, Zustand, Tailwind CSS
- **Databases & Caching:** MongoDB (Mongoose), PostgreSQL, MySQL, Redis (Caching & Queues), Prisma, TypeORM
- **Background Queues & Tools:** BullMQ, Redis, Git, Postman, Xcode, Android Studio, CocoaPods, Gradle, Linux
- **Security & Middleware:** JWT Authentication, Role-Based Access Control (RBAC), Bcrypt, Zod, Joi, Rate Limiting, CORS
- **Cloud & Payments:** AWS S3 (Presigned URLs), Stripe (Charges, Webhooks, PaymentSheet), Razorpay, FCM Notifications

PROFESSIONAL EXPERIENCE

WebiWork Technologies Pvt. Ltd. — Indore, MP, India **January 2022 – Present**

Senior Full-Stack & Mobile Developer *Late 2024 – Present*

Leading full-stack architecture, REST API design, and cross-platform mobile app delivery across media, EdTech, and enterprise SaaS platforms.

- Architected the Suhavi digital publishing ecosystem: engineered Node.js audio streaming APIs with AWS S3 presigned URLs, built the React Native mobile app, and developed Next.js web portals.
- Implemented background audio playback in React Native using react-native-track-player, handling lock-screen controls and audio ducking during phone calls.
- Built an offline chapter download manager with @notifee/react-native foreground services and integrated react-native-mmkv for fast local data persistence.
- Engineered an asynchronous assessment evaluation engine for AimQTest using BullMQ and Redis, reducing exam submission latency from 8s to <150ms.
- Designed MongoDB schemas with Mongoose to calculate and store student assessment scores across 10+ cognitive test categories.
- Engineered a multi-role B2B SaaS backend in NestJS and PostgreSQL with RBAC guards for AutoSpa, alongside a React Native vehicle inspection mobile app.
- Integrated Stripe and Razorpay payment gateways with webhook listeners to handle charge confirmations, customer refunds, and automated invoice receipts.

Full-Stack & Mobile Developer *Early 2023 – Late 2024*

Built production marketplace APIs, cross-platform mobile apps, and real-time communication services.

- Built core backend REST APIs and mobile app for LittleBigShed (P2P equipment rentals) using NestJS, MySQL, TypeORM, and React Native bare workflow.
- Integrated Stripe Connect with @stripe/stripe-react-native PaymentSheet for secure in-app card payments, security deposit holds, and webhook listeners.
- Implemented real-time buyer-seller messaging using Socket.io WebSockets with chat rooms, message persistence in MySQL, and push notifications.
- Developed a background cron scheduler service using NestJS and Prisma to automatically update booking statuses and send overdue rental email notifications.
- Engineered full-stack video sharing and subscription features (VideoApp) using NestJS, PostgreSQL/TypeORM, and React with Stripe billing.

WEBIWORK TECHNOLOGIES PVT. LTD. • PROFESSIONAL EXPERIENCE (CONTINUED)

Associate Full-Stack & Mobile Developer *January 2022 – Early 2023*

Built foundational REST APIs, database schemas, and e-commerce mobile screens.

- Developed REST APIs in NestJS and Node.js for EasySprint (project and timesheet tracking), modeling MongoDB schemas with Mongoose for organizations, projects, and tasks.
- Integrated asynchronous background message queues to process developer activity and timesheet logs without impacting API response times.
- Built mobile e-commerce screens in React Native 0.71 (ShopifyECommerce) with persistent shopping cart state using AsyncStorage and Redux Toolkit.
- Implemented customer support live chat using Socket.io WebSockets and room-based event broadcasting.

SELECTED PROJECTS

Suhavi Audiobooks & Publishing Platform — End-to-End System

Tech Stack: *Node.js, Express, React Native, Next.js, AWS S3, Redis, Track Player, MMKV, Redux Toolkit*

- Built secure audio streaming endpoints using presigned AWS S3 URLs with byte-range chunk requests for fast audio playback.
- Developed React Native mobile app with background audio streaming, lock-screen notification controls, and offline chapter downloads.
- Built Next.js web application portals for authors and publishers with PDFTron WebViewer for browser-based eBook proofing.
- Integrated Redis caching and react-native-mmkv storage to deliver instant offline library loading and cached book catalogs.

AimQTest — Production Cognitive Assessment Platform

Tech Stack: *MongoDB, Express.js, React.js / Next.js, Node.js, BullMQ, Redis, AWS S3, Razorpay*

- Built complete full-stack exam engine: interactive Next.js exam UI, Express REST endpoints, and structured MongoDB schemas.
- Engineered an asynchronous BullMQ background pipeline with Redis job deduplication to generate and store multi-page psychometric PDF evaluations.
- Integrated Razorpay payment gateway for exam enrollments and Excel data export modules for institutional administrators.
- Rendered interactive student assessment charts using SVG components, attaching visual reports to generated PDFs.

LittleBigShed (LBS) — Full-Stack P2P Rental Marketplace & Mobile App

Tech Stack: *NestJS, React Native, MySQL, TypeORM, Stripe Connect, Socket.io, AWS S3, React Navigation*

- Developed modular NestJS controllers and services managing equipment listings, rental availability calendars, and booking requests.
- Built cross-platform React Native mobile app with Stripe PaymentSheet for card checkout and security deposits.
- Built real-time messaging between equipment borrowers and lenders using Socket.io rooms with database message storage.
- Created automated cron jobs to track rental duration, expire pending requests, and dispatch email reminders via Nodemailer.

AutoSpa — Dealership Service SaaS & Mobile Inspection Tool

Tech Stack: *NestJS, React Native, PostgreSQL, BullMQ, Stripe Billing, Camera Permissions, AWS S3*

- Engineered multi-tenant NestJS backend with RBAC guards ensuring vehicle records remain strictly isolated by dealership branch.
- Developed React Native vehicle intake inspection app allowing technicians to photograph damages and complete service checklists.
- Built BullMQ background workers for automated vehicle inspection report generation and photo uploads to AWS S3.
- Integrated Stripe subscription billing with webhooks to manage recurring monthly software subscriptions and automated invoices.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Software Engineering (2015 – 2019)

Sri Aurobindo Institute of Technology, Indore, MP, India
