JITENDRA KUSHWAH

Senior MERN Stack Developer | Full-Stack JavaScript & Next.js Engineer

jitendrakushwahsingh@gmail.com • +91 9009355417 • Indore, MP, India • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

Full-Stack JavaScript/TypeScript Software Engineer with ~5 years of progressive experience at WebiWork Technologies designing, building, and deploying web applications across the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js. Experienced in developing high-throughput RESTful APIs, designing scalable MongoDB schemas with Mongoose, and building responsive web interfaces using React.js, Next.js (SSR/SSG), and Redux Toolkit. Skilled in implementing background job queues with BullMQ and Redis, real-time WebSockets with Socket.io, and payment integrations with Stripe and Razorpay.

TECHNICAL SKILLS

- **Core MERN Stack:** MongoDB, Express.js, React.js, Node.js, Next.js (App & Pages Router, SSR, SSG), TypeScript, JavaScript
- **Frontend Architecture:** React.js, Next.js, Redux Toolkit, Zustand, HTML5, CSS3, Tailwind CSS, Responsive Web Design
- **Backend & APIs:** Node.js, Express.js, NestJS, RESTful APIs, WebSockets (Socket.io), MVC Pattern
- **Databases & Modeling:** MongoDB (Mongoose Schemas, Indexing, CRUD), PostgreSQL, MySQL, Redis (Caching & Queues), Prisma
- **Background Queues & Tools:** BullMQ, Redis, Git, Postman, Vite, Webpack, Linux
- **Cloud & Storage:** AWS S3 (File Uploads, Presigned URLs), Cloudinary
- **Security & Middleware:** JWT Authentication, Role-Based Access Control (RBAC), Bcrypt, Zod, Joi, CORS, Rate Limiting
- **Payments & Third-Party:** Stripe (Charges, Webhooks), Razorpay, Nodemailer, Firebase Cloud Messaging (FCM)

PROFESSIONAL EXPERIENCE

WebiWork Technologies Pvt. Ltd. — Indore, MP, India **January 2022 – Present**

Senior MERN Stack Developer

Late 2024 – Present

Leading full-stack MERN engineering, Next.js web application architecture, and REST API development across client platforms.

- Architected web portals for Suhavi's digital publishing platform using Next.js and React, creating distinct portals for readers, publishers, authors, and admin moderators.
- Integrated PDFTron WebViewer into the publisher portal, allowing publishers to review and proof eBooks directly in the browser.
- Built full-stack psychometric testing features for AimQTest, connecting Next.js student interfaces with an Express.js backend and MongoDB database.
- Designed MongoDB schemas and Mongoose models to store student assessment answers, calculate psychological scores, and persist test results.
- Built an asynchronous report generation service using BullMQ and Redis, processing exam scoring in the background and uploading PDF reports to AWS S3.
- Developed full-stack rental features for ShareLlama, combining Express.js REST APIs with Next.js frontends, distance-based gear search, and Stripe payments.
- Standardized centralized Axios interceptors with automated JWT token refresh and error handling across all Next.js applications.

Full-Stack Developer (MERN Stack)

Early 2023 – Late 2024

Developed full-stack marketplace features, database workflows, and real-time communication tools.

- Built full-stack rental features for LittleBigShed, connecting React.js and Next.js interfaces with a Node.js/NestJS backend and MySQL database.
- Implemented secure payment workflows using Stripe Connect, handling card payments, security deposits, and webhook listeners for booking confirmation.
- Built real-time messaging between borrowers and lenders using Socket.io WebSockets, integrating chat notifications and message state management.
- Created admin management pages using Next.js and Zustand for managing item categories, rental disputes, and user verifications.
- Developed full-stack video subscription features for VideoApp using Node.js, PostgreSQL/TypeORM, and React with Stripe billing.

WEBIWORK TECHNOLOGIES PVT. LTD. • PROFESSIONAL EXPERIENCE (CONTINUED)

Associate Full-Stack Developer

January 2022 – Early 2023

Built foundational MERN applications, real-time dashboards, and e-commerce integrations.

- Developed MERN stack features for EasySprint, building MongoDB Mongoose schemas, Node.js backend endpoints, and React.js web dashboards for task management.
- Integrated background message queues to process developer activity and timesheet logs without slowing down web dashboard response times.
- Built e-commerce admin features for ShopifyECommerce, combining a Next.js admin dashboard with an Express.js backend and Socket.io customer chat.
- Built interactive homepage widgets in React for UpSell, creating reusable product sliders and banner components configured from backend APIs.

SELECTED PROJECTS

Suhavi — Multi-Portal Digital Publishing Ecosystem (Next.js & APIs)

Tech Stack: *Next.js (SSR/SSG), React.js, TypeScript, Redux Toolkit, PDFTron WebViewer, i18next, REST APIs*

- Built 5 Next.js web applications tailored to readers, publishers, authors, and admin moderators with shared UI components.
- Integrated PDFTron WebViewer for browser-based eBook proofing and manuscript reading with zero native plugins.
- Standardized centralized Axios interceptors with automated token refresh, cached responses, and multi-language localization.
- Engineered public reader web audio player with streaming state synchronized across dynamic client-side routes.

AimQTest — Production MERN Cognitive Assessment Platform

Tech Stack: *MongoDB, Express.js, React.js / Next.js, Node.js, BullMQ, Redis, AWS S3, Razorpay, TypeScript*

- Built complete full-stack exam engine: interactive Next.js exam UI, Express REST endpoints, and structured MongoDB schemas.
- Engineered an asynchronous BullMQ background pipeline with Redis job deduplication to generate and store multi-page psychometric PDF evaluations.
- Integrated Razorpay payment gateway for exam enrollments and Excel data export modules for institutional administrators.
- Rendered interactive student assessment charts using SVG components, attaching visual reports to generated PDFs.

LittleBigShed — Full-Stack P2P Rental Marketplace

Tech Stack: *React.js, Next.js, Node.js, NestJS, MySQL, Stripe Connect, Socket.io, AWS S3*

- Built full-stack rental workflows: item browsing, booking calendar, two-phase Stripe payment authorization, and dispute management.
- Implemented real-time chat between equipment borrowers and lenders using Socket.io WebSockets.
- Engineered responsive SEO landing pages with Next.js server-side rendering and structured JSON-LD schemas.
- Constructed admin dashboard with Zustand for managing rental disputes, item categories, and user verification.

ShareLlama — Modern Full-Stack Equipment Sharing Platform

Tech Stack: *Express.js, Next.js, PostgreSQL, Prisma, Stripe Connect, Socket.io, Zod, Tailwind CSS*

- Engineered full-stack rental platform featuring distance-based local equipment search using latitude and longitude calculations.
- Integrated Stripe Connect for automated lender payouts and digital rental agreement signing.
- Built clean server-side rendered interfaces in Next.js optimized for mobile and desktop viewports.
- Implemented strict request validation with Zod schemas and global error handling middleware.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Software Engineering (2015 – 2019)

Sri Aurobindo Institute of Technology, Indore, MP, India
