JITENDRA KUSHWAH

Senior React Native Developer | iOS & Android Cross-Platform Applications

jitendrakushwahsingh@gmail.com • +91 9009355417 • Indore, MP, India • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

Mobile Application Developer with ~5 years of progressive experience at WebiWork Technologies building, optimizing, and releasing production iOS and Android apps using React Native, TypeScript, and React 18/19. Experienced in core mobile capabilities including background audio streaming with react-native-track-player, native module bridging with Swift and Kotlin, foreground download managers with @notifee/react-native, high-speed local storage with react-native-mmkv and AsyncStorage, and mobile payments with Stripe. Skilled in state management using Redux Toolkit, intuitive navigation with React Navigation, and integrating REST APIs with Axios.

TECHNICAL SKILLS

- **Mobile Technologies:** React Native (v0.71–0.85), React.js (v18/19), TypeScript, JavaScript (ES6+), iOS, Android
- **Native Bridging & Languages:** Native Module Bridging (Swift & Kotlin basics), Bare Workflow, CocoaPods & Gradle
- **State Management & Storage:** Redux Toolkit (RTK), Context API, react-native-mmkv, AsyncStorage
- **Media & Native Features:** react-native-track-player (Background Audio, Media Controls), react-native-video, Image Picker
- **Background & Notifications:** @notifee/react-native (Foreground Services), Firebase Cloud Messaging (FCM), Local Notifications
- **Navigation & Localization:** React Navigation (Stack, Bottom Tabs, Drawer), i18next (Multilingual App Localization)
- **Payments & Networking:** @stripe/stripe-react-native, Socket.io Client, Axios (Interceptors, Error Handling)
- **Build Tools & Environment:** Xcode, Android Studio, CocoaPods, Gradle, Postman, Git, Flipper

PROFESSIONAL EXPERIENCE

WebiWork Technologies Pvt. Ltd. — Indore, MP, India **January 2022 – Present**

Senior React Native Developer

Late 2024 – Present

Leading cross-platform mobile development, native module integration, and performance tuning across media and enterprise applications.

- Architected the Suhavi mobile app using React Native 0.81 and React 19, delivering an audiobook streaming and eBook reader application with smooth offline capabilities.
- Implemented background audio playback using react-native-track-player, integrating iOS and Android lock-screen controls and handling audio ducking (RemoteDuck) during incoming phone calls.
- Built an offline chapter download manager using @notifee/react-native foreground services, allowing users to download audio tracks with live progress notifications and pause/resume support.
- Adopted react-native-mmkv for fast local data persistence, speeding up offline library loading and caching user settings.
- Implemented a native speech-to-text bridge module in Swift (iOS) and Kotlin (Android) for EasyTask, enabling users to post tasks by voice dictation.
- Developed the AutoSpa mobile inspection app (React Native 0.85), implementing camera permission handling, photo capture, video recording, and service checklists.
- Configured multi-language localization (English, Punjabi) using i18next and dynamic Light/Dark theme switching with React Context.

React Native Developer

Early 2023 – Late 2024

Developed production cross-platform mobile applications for rental marketplaces, media playback, and live chat.

- Built and maintained the LittleBigShed iOS and Android mobile app (React Native 0.77 bare workflow) for peer-to-peer equipment rentals.
- Integrated @stripe/stripe-react-native PaymentSheet for secure in-app credit/debit card payments, security deposit pre-authorization, and Apple Pay.
- Implemented real-time in-app chat using Socket.io client, featuring message history caching, read receipts, and FCM push notifications.
- Built photo and video upload workflows with client-side image compression before uploading directly to AWS S3.
- Developed video streaming and playback screens for VideoApp using react-native-video, adding play/pause controls, buffering indicators, and full-screen mode.

WEBIWORK TECHNOLOGIES PVT. LTD. • PROFESSIONAL EXPERIENCE (CONTINUED)

Associate React Native Developer

January 2022 – Early 2023

Built foundational e-commerce mobile applications, reusable UI components, and device utilities.

- Developed mobile e-commerce screens in React Native 0.71 (ShopifyECommerce), managing persistent shopping cart state with AsyncStorage and Redux Toolkit.
- Implemented product catalog carousels, category filters, discount coupon inputs, and multi-step checkout screens.
- Built dynamic homepage UI components for UpSell, creating reusable banner, slider, and product grid widgets configured from backend API responses.
- Developed Accurate Brahma Muhurta utility app, fetching device GPS coordinates to calculate daily timings and scheduling native device alarms.

SELECTED PROJECTS

Suhavi — Audiobook Streaming & eBook Reader Mobile App

Tech Stack: *React Native 0.81, React 19, TypeScript, react-native-track-player, MMKV, Notifee, i18next, Redux Toolkit*

- Built an audio streaming service running in the background with lock-screen media notification controls and scrub bar.
- Implemented offline chapter downloads using @notifee foreground service with download progress bars and resume capabilities.
- Stored cached book catalogs and listening timestamps locally using react-native-mmkv for instant offline startup.
- Added multi-language support with i18next, allowing users to toggle between English and regional language content seamlessly.

EasyTask — Voice-Enabled Gig Marketplace Mobile App

Tech Stack: *React Native 0.81, Swift (iOS), Kotlin (Android), Native Modules, Redux Toolkit, Socket.io, FCM*

- Created native bridge modules in Swift and Kotlin connecting platform speech recognition engines directly to React Native.
- Enabled field contractors to dictate task descriptions using speech-to-text, speeding up mobile task creation.
- Integrated real-time task bidding updates and direct messaging using Socket.io client and Firebase push notifications.
- Built animated bottom-sheet modals and clean form validation using React Native and Redux Toolkit.

LittleBigShed — P2P Equipment Rental Marketplace Mobile App

Tech Stack: *React Native 0.77, TypeScript, @stripe/stripe-react-native, Socket.io, AWS S3, React Navigation*

- Implemented end-to-end rental booking screens with Stripe PaymentSheet for card checkout and security deposits.
- Built real-time borrower-lender chat using Socket.io with local message caching and offline message queues.
- Integrated camera picker with client-side image compression and multipart photo uploads to AWS S3.
- Added item condition verification using react-native-video so users can inspect equipment videos prior to booking.

AutoSpa — Dealership Vehicle Inspection Mobile Application

Tech Stack: *React Native 0.85, React 19, Redux Toolkit, Camera Permissions, FCM, AsyncStorage*

- Developed vehicle intake inspection screens allowing technicians to photograph damages and complete multi-point service checklists.
- Handled native camera and photo library permissions gracefully across both iOS and Android platforms.
- Implemented offline data caching using AsyncStorage so technicians can record inspections in basements with weak cell reception.
- Integrated Firebase Cloud Messaging to send technicians instant push notifications when new service orders are assigned.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Software Engineering (2015 – 2019)

Sri Aurobindo Institute of Technology, Indore, MP, India
