JITENDRA KUSHWAH

Senior Backend Developer | Node.js, Express, NestJS & Cloud APIs

jitendrakushwahsingh@gmail.com • +91 9009355417 • Indore, MP, India • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

Backend Software Engineer with ~5 years of progressive experience at WebiWork Technologies designing, building, and deploying production RESTful APIs and backend services using Node.js, TypeScript, Express.js, and NestJS. Proven track record implementing background job queues with BullMQ and Redis, database modeling and query optimization across MongoDB, PostgreSQL, and MySQL using Mongoose, Prisma, and TypeORM, and integrating third-party services including Stripe, Razorpay, and AWS S3. Skilled in writing clean, modular code with JWT authentication, role-based access control (RBAC), input validation, and real-time WebSockets.

TECHNICAL SKILLS

- **Languages & Runtimes:** Node.js, TypeScript, JavaScript (ES6+), SQL
- **Backend Frameworks:** Express.js, NestJS, RESTful APIs, MVC Architecture, Socket.io (WebSockets)
- **Databases & Caching:** MongoDB (Mongoose), PostgreSQL, MySQL, Redis (Caching & Job Queues)
- **ORMs & Query Builders:** Prisma, TypeORM, Mongoose
- **Background Queues & Tools:** BullMQ, Redis, Cron Schedulers, Postman, Git, Docker (Basics), Linux
- **Cloud & Storage:** AWS S3 (File Uploads, Presigned URLs), Cloudinary
- **Security & Middleware:** JWT Authentication, Role-Based Access Control (RBAC), Bcrypt, Zod, Joi, Rate Limiting, CORS
- **Payment Gateways & APIs:** Stripe (Charges, Webhooks, Payouts), Razorpay, Nodemailer, Firebase Cloud Messaging (FCM)

PROFESSIONAL EXPERIENCE

WebiWork Technologies Pvt. Ltd. — Indore, MP, India

January 2022 – Present

Senior Backend Developer

Late 2024 – Present

Leading backend API development, database design, and cloud service integrations across audio streaming and enterprise SaaS applications.

- Developed core REST APIs for Suhavi Audiobooks using Node.js and Express/Next.js, implementing audio streaming endpoints with presigned AWS S3 URLs for fast and secure playback.
- Built an asynchronous PDF report generation pipeline for AimQTest using BullMQ and Redis, running exam scoring in the background to prevent API request timeouts.
- Designed and maintained MongoDB collections and Mongoose schemas for student assessments, structuring data models to efficiently calculate and store exam scores.
- Engineered a multi-role B2B SaaS backend in NestJS and PostgreSQL for AutoSpa, implementing Role-Based Access Control (RBAC) guards for admin, manager, and technician roles.
- Built background worker queues with BullMQ and AWS S3 SDK to handle technician photo uploads and automated PDF export reports asynchronously.
- Developed REST endpoints for ShareLlama using Express.js and Prisma/PostgreSQL, adding distance-based location filtering to show rental equipment closest to user coordinates.
- Integrated Stripe and Razorpay payment gateways with webhook listeners to handle charge confirmations, customer refunds, and automated invoice receipts.

Backend Developer

Early 2023 – Late 2024

Developed production marketplace APIs, database workflows, and real-time communication services.

- Built core backend REST APIs for LittleBigShed (P2P equipment rental platform) using NestJS, TypeScript, and MySQL with TypeORM, managing users, item catalogs, and rental bookings.
- Integrated Stripe Connect payments, implementing payment intent creation, security deposit holds, and webhook listeners for booking payment confirmations.
- Implemented real-time buyer-seller messaging using Socket.io WebSockets with chat rooms, message persistence in MySQL, and push notification triggers.
- Developed a background cron scheduler service using NestJS and Prisma to automatically update booking statuses and send overdue rental email notifications.
- Engineered a video sharing and subscription backend (VideoApp) in NestJS and PostgreSQL with TypeORM, handling video metadata and Stripe subscription billing.

WEBIWORK TECHNOLOGIES PVT. LTD. • PROFESSIONAL EXPERIENCE (CONTINUED)

Associate Backend Developer

January 2022 – Early 2023

Built foundational REST APIs, database schemas, and background communication services.

- Developed REST APIs in NestJS and Node.js for EasySprint (project and timesheet tracking), modeling MongoDB schemas with Mongoose for organizations, projects, and tasks.
- Integrated asynchronous background message queues to process developer activity and timesheet logs without impacting API response times.
- Built e-commerce backend APIs in Express.js and PostgreSQL (ShopifyECommerce), implementing JWT login, password hashing with bcrypt, and Joi validation middleware.
- Implemented customer support live chat using Socket.io, creating room-based messaging between store administrators and customers.

SELECTED PROJECTS

Suhavi Audiobooks & Publishing Platform — Core APIs & Media Delivery

Tech Stack: *Node.js, TypeScript, Express, Next.js API Routes, AWS S3, Redis, Axios, JWT*

- Built secure audio streaming endpoints using presigned AWS S3 URLs with byte-range chunk requests for smooth audio playback.
- Implemented multi-role authentication (listeners, authors, publishers, admins) using JWT tokens and OTP mobile verification.
- Integrated Redis caching and response interceptors to cache book catalogs, reducing repetitive database queries.
- Developed listener progress tracking APIs to save audio chapter timestamps, bookmarks, and user library updates.

AimQTest — Asynchronous Exam Evaluation & PDF Generation Engine

Tech Stack: *Node.js, Express, MongoDB, Mongoose, BullMQ, Redis, AWS S3, Razorpay*

- Engineered a BullMQ worker queue with Redis to process student assessment submissions and calculate test scores in the background.
- Generated multi-page student evaluation PDF reports dynamically, uploading generated documents to AWS S3 and returning download links.
- Implemented Redis job deduplication to prevent duplicate report generation requests when users submit exam forms multiple times.
- Built Excel export endpoints using xlsxToJson, enabling school administrators to download batch student exam results.

LittleBigShed (LBS) — P2P Rental Marketplace Backend

Tech Stack: *NestJS, TypeScript, MySQL, TypeORM, Stripe Connect, Socket.io, AWS S3, Cron*

- Developed modular NestJS controllers and services managing equipment listings, rental availability calendars, and booking requests.
- Integrated Stripe Connect payments, supporting security deposit holds and webhook events for payment captures and payouts.
- Built real-time messaging between equipment borrowers and lenders using Socket.io rooms with database message storage.
- Created automated cron jobs to track rental duration, expire pending requests, and dispatch email reminders via Nodemailer.

AutoSpa — Multi-Tenant Dealership Service SaaS Backend

Tech Stack: *NestJS, TypeScript, PostgreSQL, BullMQ, Stripe Billing, AWS S3, RBAC Guards*

- Engineered multi-tenant database queries ensuring service records and vehicle inspection data remain strictly isolated by dealership branch.
- Implemented RBAC authorization guards and JWT middleware to protect admin, service advisor, and technician endpoints.
- Built BullMQ background workers for automated vehicle inspection report generation and photo uploads to AWS S3.
- Integrated Stripe subscription billing with webhooks to manage recurring monthly software subscriptions and automated invoices.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Software Engineering (2015 – 2019)

Sri Aurobindo Institute of Technology, Indore, MP, India
